

CCS Logistics

2 March 2016

Oceana Group (CCS Logistics context)

As a 100% subsidiary of the Oceana Group, a JSE listed company with a market cap of +-R12 billion, **CCS Logistics operates modern cold storage facilities and offer transport solutions to customers in southern Africa.**

CCS Logistics has been operating since 1971 and has recently achieved level 2 BBBEE status.

Oceana Group

CCS Logistics Introduction

As the **largest cold store operator in Africa**, CCS Logistics owns and operates **thirteen refrigerated warehouse facilities** in the major centres and harbours of **South Africa** and **Namibia** and **Angola**. Collectively, they offer customers **143 000 tons** of temperature controlled storage and handling capacity. Services were expanded in 2013 to now also include order and case **picking** as well as **transport**. These stores are capable of storing product at temperatures from **ambient** to as low as **minus 60** degrees. It is thus suitable for poultry, fish, meat, vegetables, dairy, margarine and fruit. Fruit activity is in both commercial and sterilised fruit (specialized reefer ships and containers).

Designed for fast turn-around times, **CCS Logistics** operates some of the most advanced and largest cold storage facilities in southern Africa. Facilities are strategically placed to give easy access from the sea, the railway and main roads.

Route to market

The existing geographical footprint and capacity of our facilities, offer the ideal opportunity for tailor made outbound solutions for our customers.

Further planned expansion in services, technology and footprint is well progressed and provides exciting opportunities for our customers and chosen partners.

Route to Africa

Luanda

CCS Logistics operates **five quayside cold stores**. The facilities are located in the ports of Durban, Cape Town, Walvis Bay and Luanda.

These facilities already enable us to receive and load stock directly over the quay destined for African markets at lowest cost.

An Africa cold store expansion plan is in place.
