
Differentiated Models of Care

Adherence Clubs, Fast Lane Spaced Appointments,
Community ART Groups, Community Pick-up Points

Médecins Sans Frontières

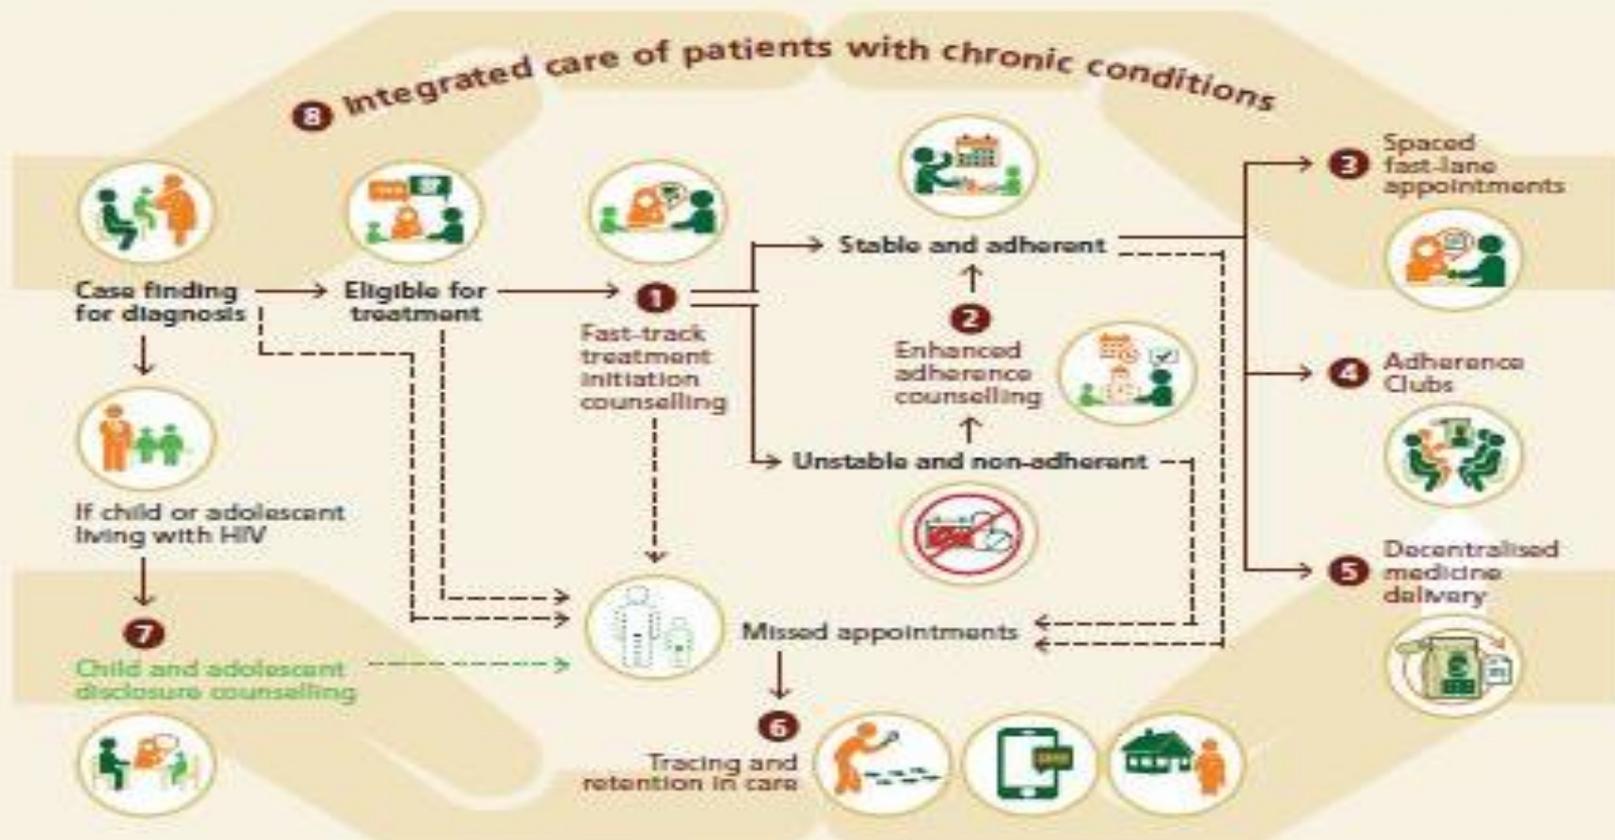

- MSF / Doctors without Borders
- Nonprofit, International Medical Humanitarian Organisation
- Medical Aid in 70 countries worldwide
- Political & Financial Independence
- In South Africa since 1999

Differentiated Models Of Care Strategy

ADHERENCE GUIDELINES FOR HIV, TB AND NCDs

STANDARD OPERATING PROCEDURES

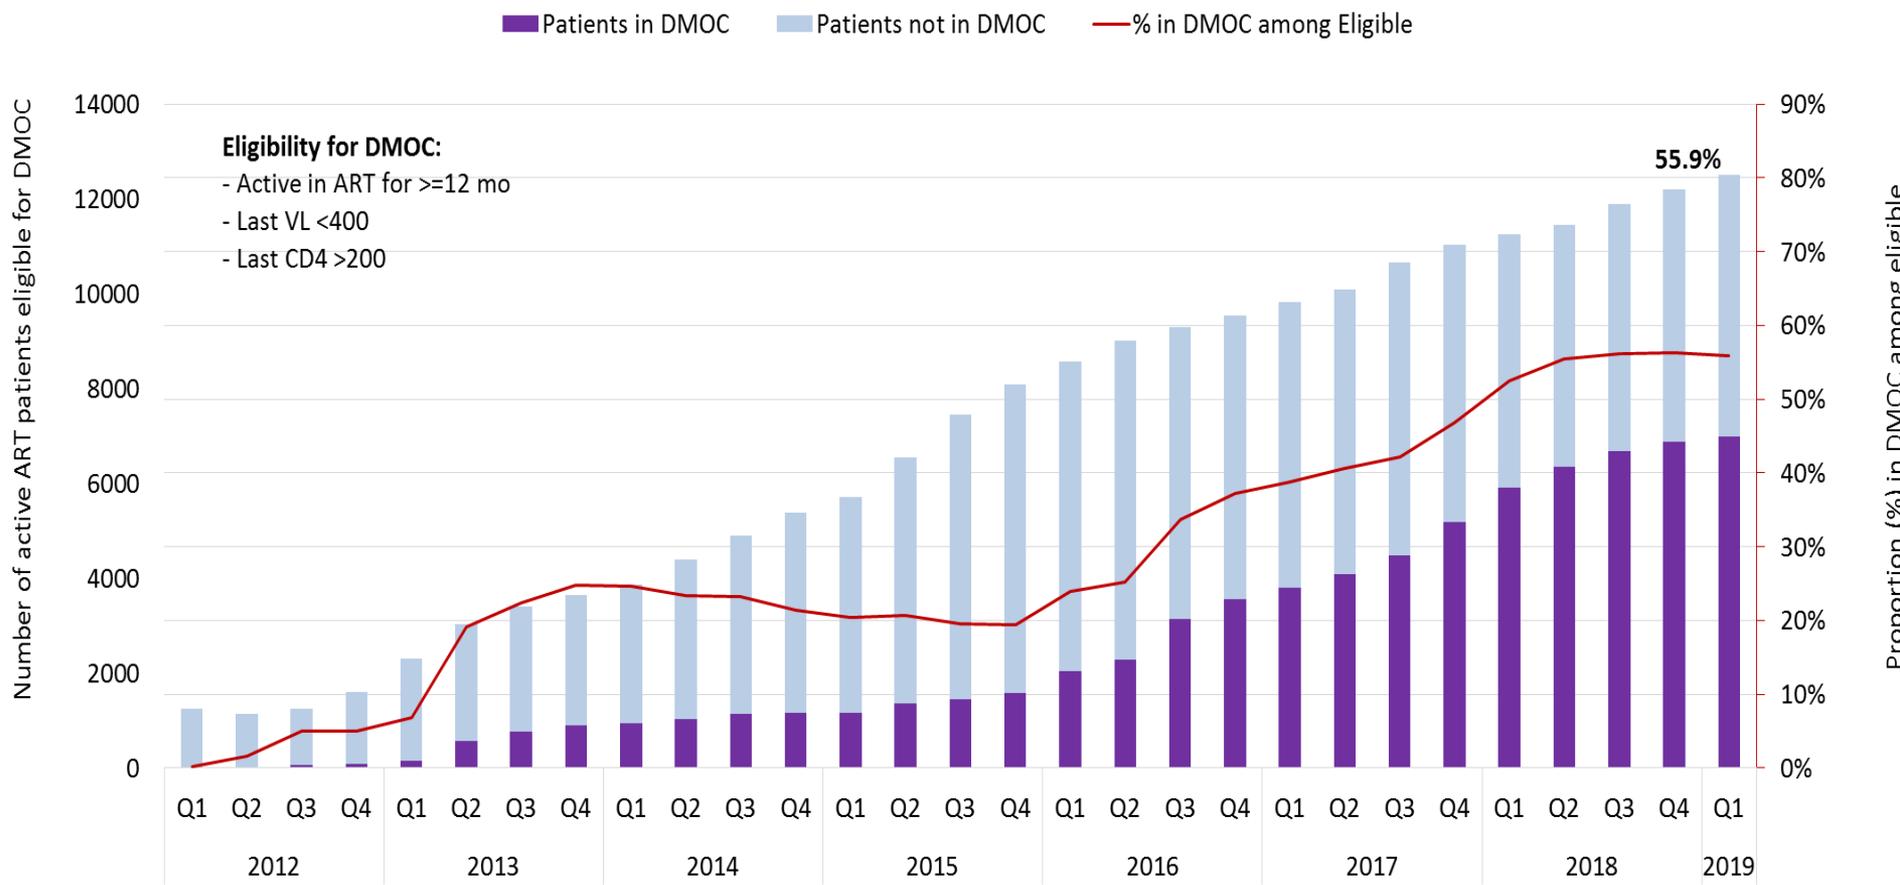

Differentiated Models Of Care and National Adherence Guideline

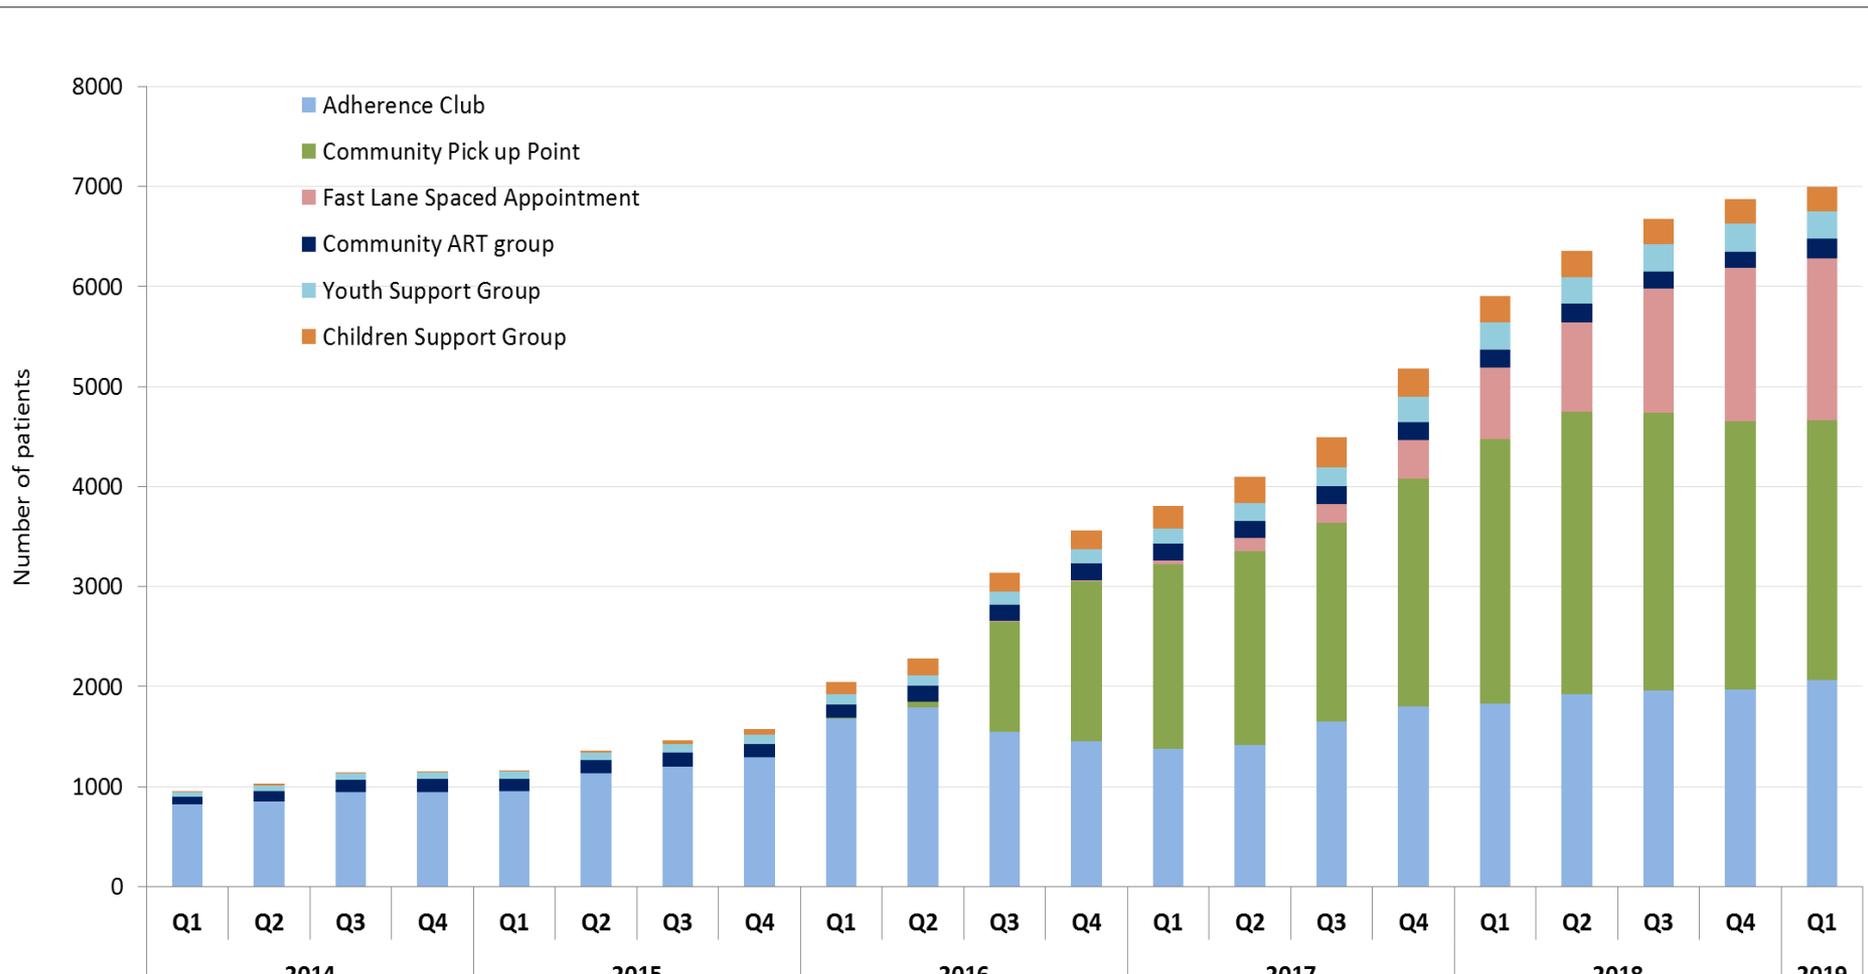

2017: MSF mentoring program to support DoH with implementation of the National Adherence Guidelines (NAGL)

- Pre NAGL implementation Assessment
 - Training and Mentorship on NAGL
- Post NAGL implementation assessment
 - Conducted by District HAST Manager.
 - 'Sign-off' of clinics that are deemed NAGL Competent
 - **80% improvement from Pre to Post assessment**

Enrollment in DMOC among eligible active patients on ART

Number of patients in DMOC

Challenges

Confusion with CCMDD as model OR delivery strategy

Recruitment in community PUP became difficult as no transport organized to small sites

Strict targets for recruitment in each model of care hampers choice

Implementation of Youth and children support group

Lessons Learned

- Give patients CHOICE of ART delivery models
- Role Community Health Workers/ Patients Supporters
- Promotion, Education, File Screening improves recruitment
- Educational session during Clubs days
- Recruitment of patients according to cohort improves retention (Blood Collection day)
- Children and Adolescence support group are essential to provide peer support and ensure retention in care
