

Where Do We Go From Here?

Data Use Innovations and Best Practices Meeting

Sept 06, 2017

THEMES FROM THE DAY

- **Granular, timely review/reaction** to data is feasible and necessary
- Optimizing the existing Health Information Systems for 90:90:90
 - Expanded use of **Tier modules** (HTC, pre-ART)
 - **NHLS**: CD4, VLD, VLS
- Human Resources (**Data capturers, linkage officers, data quality mentors**).
- **Unique identifier**
 - **Indicator**: % of Tier entries with UID recorded
- Data interpretation and end user needs
- **Going beyond pilots** (scaling up immediately)
- Duplicate testing (identifying known vs. new vs. double counted)
 - Specific emphasis on HTC (community-facility)
 - **Indicator**: HTC with linkage to ART

SHARING BEST PRACTICES

- Ways to share better/best practices in the future
 - **Webinars**
 - **Skype calls**
 - **Other fora/ avenues**
- **Generic protocol** to be developed over next month that will **facilitate greater dissemination of program data** in the **peer-reviewed fora**

**Thank you for
participating!**
